Details of National Webinar	On July 16, 2024, Department of Agadatantra organised a national webinar on Google meet platform to celebrate World Snake Day, focusing on the critical topic of “ Management of snake envenomation” at Shree Swaminarayan Ayurvedic College with the Divine blessings of Shastri Swami Premswaroopdasji. Swami Bhaktavatsaldasji, Vice President , Swaminarayan University; Swami Bhaktinandandasji, Vice President, Swaminarayan University; Ghanashyam swamiji, Anupamdas Swamiji; Prof(Dr.) M.S.Rao, Provost, Swaminarayan University; Dr. Rohit Gokarn, Dean, Faculty of Ayurveda.

Dr Manuprasad K.S, Associate Professor and HOD, Parul Institute of Ayurved, Parul University, Vadodara Gujrat was the resource person. Dr. Rohit Gokarn, Dean, Faculty of Ayurveda blessed the event with an opening note.

Dr. Anita Ratnavat, Prof. & Head, Department of Agadatantra welcomed the dignitaries. Dr Shanti R Nair associate professor, Department of Agad tantra was the moderator for the programme who delivered the vote of thanks. The event brought together 160 beneficiaries which include UG Scholars, Pg Scholars, doctors and Professors from different part of India. The World Snake Day celebration aims to raise awareness about the importance of snakes in our ecosystem and to promote their conservation and these awareness talks plays an pivotal role in bringing down the rate of snake bite and mortality. Dr Manuprasad highlighted the general information of snake diversity, Morphological Characteristics, venomous and non-venomous snakes, precautions to avoid snakebite, and in detail traditional treatment of snake bite through ayurved with relevant successful case studies. Practical video demonstration was the highlight of the session. The event concluded with an interactive Question & Answer session.

Conclusion

Participants gained valuable insights into identification of venomous snakes, the latest first aid protocol. The event emphasized the importance of timely medical intervention and community education in reducing snake bite fatalities. The knowledge shared during this webinar has equipped attendees with the tool to respond effectively to snake bites, there by contributing to the overall mission of snake conservation and public health safety.
